Author Index to Volume 5

Aaltonen, J., 81

Baum, C.F., 221
Belsley, D.A., 157
Bianchi, C., 271
Bruno, G., 271

Chi, R.T.H., 1
Cividini, A., 271
Codsi, G., 57

D'Esposito, M.R., 171
Dijk, H.K. van, 183

Feelders, A.J., 119
Ferrier, G.D., 133
Furno, M., 171

Garbely, M., 147
Gilli, M., 147
Goffe, W.L., 133

Heilemann, U., 247
Hop, J.P., 183
Hughes, M, 23

Kiang, M.Y., 1

Ma, Y., 303
Münch, H.J., 247

Nagurney, A., 23

Ohlendorf, G., 105
Östermark, R., 81, 283

Pauletto, G., 147
Pearson, K.R., 57
Pouliezos, A., 41

Rogers, J., 133

Stahlecker, P., 105

Tesfatsion, L., 313
Thies, C.F., 221

Wilcoxen, P.J., 57

Yannacopoulos, D., 41

Zopounidis, C., 41

Subject Index to Volume 5

δ-method, 271
algorithms, 23
anticipated and unanticipated policy effects, 303
applied economic modelling, 57
automatic differentiation, 313
automatic initialization, 313

balance sheets, 23
Bayesian analysis, 183

comparative statics, 313
complete differential system, 313
convergence, 147
cubic splines, 221

data reconciliation, 23
decision support system (DSS), 41
domain theory, 1
dynamic linear model, 303
dynamic models, 57

economic models, 105
equation reordering, 147
expectations, 303
explanation, 119
explanation based learning, 1

finance, 119
financial ratios, 41
first-order iterations, 147
flow of funds accounting, 23
forecast errors, 271

global optimization, 133

importance sampling, 183
induction over unexplained, 1
influential parameters, 247
interior point algorithm, 283
intertemporal models, 57

knowledge-based systems, 119

large-scale econometric models, 271
linear analysis, 271
linear programming, 283

macroeconometric model, 247
maximum likelihood, 133
Monte Carlo integration, 183
multiobjective programming, 283
multiple criteria decision method, 41
multiple regression, 171
multipliers, 271

networks, 23
nonlinear estimation, 221
nonlinear least squares, 133

outliers detection, 171

parameter perturbation, 247
policy measurement, 303
policy multipliers, 303
polynomial convergence, 283
portfolio efficiency, 81
portfolio management, 81

QR factorization, 157

recursive forecasting and optimization, 81
resampled values, 171

similarly based learning, 1
simulation, 105
simulation language, 105
software, 57
structural sensitivity analysis, 247
supercomputing, 271

term structure of interest rates, 221
three-stage least-squares routines, 157

vector processing, 271
